Thank you for your purchase! Your new SpellBrite Hang Tab 10-Pack allows you maximum flexibility in hanging your SpellBrite™ sign. Using the Hang Tabs, you can:

1. Adjust the Pitch Angle of Your Sign
2. Hang Multi-Row Signs with Ease
3. Create Attention-Grabbing Sign Formations

How To Install Hang Tabs

Installing Hang Tabs is as simple as 1..2..3! Hang Tabs can be installed at any letter to letter joint on the top or bottom rail. The images below demonstrate the installation of a Hang Tab on the top rail.

Step 1	Step 2	Step 3	DONE!
			
<p>Determine where you want to install the Hang Tabs (read further for recommendations). Build your SpellBrite sign as you normally would, but leave the locations to contain a Hang Tab unconnected. Notice the "L" and "E" are unconnected above.</p>	<p>Stand your sign on a flat, solid surface. Slide the Hang Tab onto the male side of the connection area (the side containing the letter to letter connection screw).</p>	<p>Line up the rails and click the letters together while standing sign on end. Screw the letters together to complete sign assembly.</p>	<p>Done! The Hang Tab is now fully captured on the top rail and is ready to use.</p>

How To Adjust the Pitch Angle of Your Signs

To angle your SpellBrite sign down, insert the chain hooks into the holes in the back of the Hang Tab. To angle your SpellBrite sign up, insert the chain hooks into the holes in the front of the Hang Tab.

Sign Hanging Tip
Install your sign high in your window so parked cars do not block your sign. Use your Hang Tabs to hang your sign at a down angle so it "aims" at the highest traffic area in front of your business (For example, sidewalk, parking lot or street).

<p>Hook in Back</p>  <p>Sign Angles Down</p>	<p>Hook in Center</p>  <p>Sign Hangs Straight</p>	<p>Hook in Front</p>  <p>Sign Angles Up</p>

How to Hang Multi-Row Signs with Ease

First, completely assemble each of your signs and lay the signs face up on a table in the desired order and orientation. The sign below shows “CHEESEBURGER” on top and “\$4.25” centered below it.

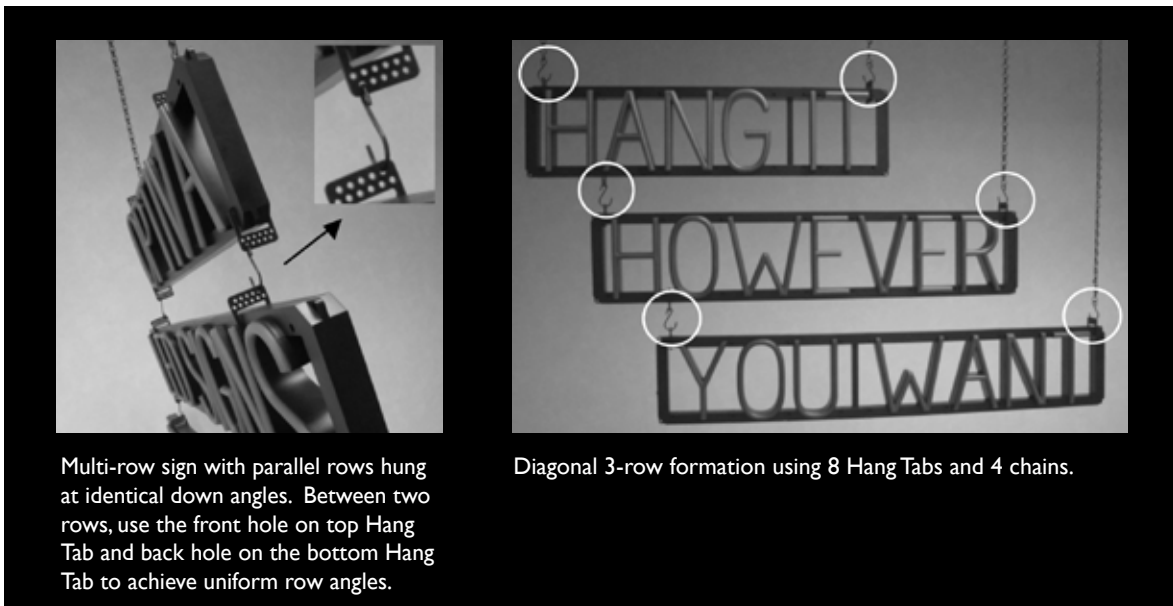

Next, determine where your Hang Tabs can be installed on the bottom rail of “CHEESEBURGER” and top rail of “\$4.25”. Once installed, your Hang Tabs can slide to any position on any rail between the illuminated letters. The arrows below indicate possible Hang Tab locations on each row.

Locate your Hang Tabs in positions in which you have a direct vertical line between the top row Hang Tab and bottom row Hang Tab. A direct vertical match will assure that the bottom row hangs straight and stays where you want it. For optimal stability and control, locate your Hang Tabs at the first vertical top/bottom match closest to the outside boundaries of the sign (closest to the end caps).

Create Attention-Grabbing Sign Formations

Using your SpellBrite™ Hang Tabs, there is virtually no limit to the types of multi-row sign formations you can build. Below are two examples. If you are located in a high-traffic area, you may consider changing your sign’s message(s) and/or formation frequently. Studies have shown that simply changing window signage increases business traffic and sales.
